COMPUTERS IN INDUSTRY

Subject Index Volume 26

Analytical hierarchy process 175
Architectures 243
Artificial intelligence 107
Automated inspection 127
Automatic feature recognition 1

Bid preparation 273

CAD/CAM 1, 41, 127
CAM 135
CIM 253, 261
CIME 209
CNC 135
Communication 253
Communication control application 135
Communication protocols 243
Component recognition 85
Computational geometry 41
Computer-aided process planning 135
Computer Integrated Manufacturing and Engineering 243
Computer vision 85
Concurrent engineering 273
Control 209
Control theory 291
Convex hull 41
Cooperative work 273
Coordinate measuring machines 127
Cutter path generation 41
Cutting 135

dc motor 93
Decision support system 75
Dependent agents 219
Digital control 93
Distributed agents 219
Distributed Artificial Intelligence 219
Distributed control 219
Distributed processes 273
Dynamic systems 61

Ethernet 253
Expert systems 107, 193

Forecasting 23
Fuzzy logic 93, 107
Fuzzy modelling 61

Global optimization 175
Grid height method 161
Group technology 85

Handling of flat flexible materials 303
Hierarchical control 281
Holonic systems 209
Human error compensation 147
Human factors 147
Hybrid approach 107

Industrial networking 243
Industrial production systems 147
Information Technology 243
Integrated design 291
Integration of sensing and control 303

Knowledge-based systems 193

Logistics 261
Logistics planning 75

Machine tools 135
Machining operation 135
Machining time estimation 41
Management applications 75
Manufacturing systems 107
MAP 253
Microcomputer applications 75
Modelling 253
Model–reality differences 281
Multi-agent systems 209
Multiattribute decision making 175

NC 41
NC data 135
NC rough cut machining 161
Networks 253
Neural networks 107
New product introduction 23

Object orientation 273

Part programming 135
PID 93
Plan-based agents 219
Process control 291
Process planning 41

Production rules 61
Protocols 253

Quality control 147

Reactive agents 219
Robotics 303
Robust back-propagation neural network 23

Scheduling 209
Self-organizing map 23
Ship design 175
Signal detection theory 147
Simulated annealing 175
Simulation 253
Solid modeling 1
Solid models 161
Spatial array 161
Standards 243
Steady-state optimisation 281
Strategic management 193
Strategic planning 75

Technology transfer 193
Tolerance 127
TOP 253

Virtual fuzzy set 61
